# Nano Bodenbeschichtung by Oberflächentechnik Preimeß

## Nanomaterial description

1. Material source or producer: Not reported

2. Manufacturing process: Not reported

3. Appearance: Not reported

4. Chemical composition: Not reported

5. Physical form/shape: Not reported

6. Purity: Not reported

7. Size distribution: Not reported

8. Solubility: Not reported

9. State of aggregation or agglomeration: Not reported

10. CAS number (if applicable): Not reported

### **Product description**

Sealant. The location of the nanoelement in the products seems to be suspended in liquids, however information about the nanomaterials used in the product is not available.

## **Applications**

#### **Exposure potential for professional end-users**

Given the nature of the product and the location of the nanoelement, exposure for the professional end-users is to be expected during use.

# **APPENDIX 1: NanoRiskCat** ● ● | ◆ ◆ Template

Hence we concluded that the overall **Exposure potential for professional end-users is** 

# **Consumer exposure potential**

Given the nature of the product and the location of the nanoelement, consumer exposure is to be expected as the product during use.

Hence we concluded that the overall **Exposure potential for consumers is** 

## **Environmental exposure potential**

Given the nature of the product and the location of the nanoelement, environmental exposure is to be expected especially during and after use. The main outlets to the environment are expected after use either directly into the water recipients and/or indirectly via the Sewage Treatment Plants into water recipient and soil.

Hence we concluded that the overall **Environmental exposure potential is**
