

APPENDIX 1: NanoRiskCat Template

Bain de Terre® Recovery Complex® produced by Zotos International, Inc.

Nanomaterial description

1. **Material source or producer: Not reported**
2. **Manufacturing process: Not reported**
3. **Appearance: Not reported**
4. **Chemical composition: Not reported**
5. **Physical form/shape: Not reported**
6. **Purity: Not reported**
7. **Size distribution: Not reported**
8. **Solubility: Not reported**
9. **State of aggregation or agglomeration: Not reported**
10. **CAS number (if applicable): Not reported**

Product description

Proclaimed by the manufacturers to “...contains patented, nourishing *nanospheres* which include grape, mango and meadow foam seed oils, along with frizz-controlling silicone elements that actively repair, protect, moisturize and add shine to hair”

(<http://www.baindeterre.com/product/bain-de-terre-recovery-complex-anti-frizz-silky-shine-serum>)

Applications

Exposure potential for professional end-users

APPENDIX 1: NanoRiskCat 2 Template

Given the nature of the product and the location of the nanoelement, exposure for the professional end-users is to be expected as the product is to be used directly on the skin.

Hence we concluded that the overall *Exposure potential for professional end-users is* 

Consumer exposure potential

Given the nature of the product and the location of the nanoelement, consumer exposure is to be expected as the product is to be used directly on the skin.

Hence we concluded that the overall *Exposure potential for consumers is* 

Environmental exposure potential

Given the nature of the product and the location of the nanoelement, environmental exposure is to be expected during bathing and washing. The main outlets to the environment are expected after use either directly into the water recipients and/or indirectly via the Sewage Treatment Plants into water recipient and soil.

Hence we concluded that the overall *Environmental exposure potential is*
