

## EO Collection produced by Incase

### Nanomaterial description:

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: Not reported
5. Physical form/shape: Spheres
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

### Product description

Luggage. The location of the nanoelement of the products is assumed to be located on the surface of the product as manufacturers states that: “Featuring NanoSphere® fabric by Schoeller Textiles AG of Switzerland, the EO Collection matches pioneering modular bag designs with a host of innovative storage options and eco-friendly, naturally self-cleaning fabric features”

### Applications

### Exposure potential for professional end-users

Given the nature of the product and the location of the nanoelement, exposure for professional end-users seems to be possible. Main contact zones is the skin.

## APPENDIX 1: NanoRiskCat●●●|◆◆ Template

Hence we concluded that the overall Exposure potential for professional end-users is ●

### Consumer exposure potential

Given the nature of the product and the location of the nanoelement, consumer exposure seems to be possible.

Hence we concluded that the overall Exposure potential for consumers is ●

### Environmental exposure potential

Given the nature of the product and the location of the nanoelement, environmental exposure seems to be possible during use.

Hence we concluded that the overall Environmental exposure potential is ●
