Nano Bio Silver produced by Nano Silver Technology

Nanomaterial description

1. Material source or producer: Not reported

2. Manufacturing process: Not reported

3. Appearance: Not reported

4. Chemical composition: Ag

5. Physical form/shape: Not reported

6. Purity: Not reported

7. Size distribution: Not reported

8. Solubility: Not reported

9. State of aggregation or agglomeration: Not reported

10. CAS number (if applicable): Not reported

Product description

Product description

Silver dispersions. As the product is on liquid form, the location of the nanoelement of the products is assumed to be suspended in liquids.

Applications

Exposure potential for professional end-users

APPENDIX 1: NanoRiskCat ● ● | ◆ ◆ Template

Given the nature of the product and the location of the nanoelement in the product, exposure for professional end-users is to be expected.

Hence we concluded that the overall **Exposure potential for professional end-users is**

Consumer exposure potential

Given the nature of the product and the location of the nanoelement in the product, consumer exposure is to be expected.

Hence we concluded that the overall **Exposure potential for consumer is**

Environmental exposure potential

Environmental exposure to the product is possible.

Hence we concluded that the overall **Environmental exposure potential is**
