

Nanochrana na textil, kožu 150ml perm

Nanomaterial description

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: Not reported
5. Physical form/shape: Not reported
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

Product description

Product description

Sealant. As the product is on liquid form, the location of the nanoelement of the products is assumed to be suspended in liquids.

Applications

Exposure potential for professional end-users

APPENDIX 1: NanoRiskCat ● ● ● | ● Template

Given the nature of the product and the location of the nanoelement in the product, exposure for professional end-users is to be expected.

Hence we concluded that the overall *Exposure potential for professional end-users is* ●

Consumer exposure potential

Given the nature of the product and the location of the nanoelement in the product, consumer exposure is to be expected.

Hence we concluded that the overall *Exposure potential for consumer is* ●

Environmental exposure potential

Given the nature of the product and the location of the nanoelement, environmental exposure is to be expected especially during and after use. The main outlets to the environment are expected after use either directly into the water recipients and/or indirectly via the Sewage Treatment Plants into water recipient and soil.

Hence we concluded that the overall *Environmental exposure potential is* ●
