

## RunCam TX100 Nano

### Nanomaterial description

1. **Material source or producer: Not reported**
2. **Manufacturing process: Not reported**
3. **Appearance: Not reported**
4. **Chemical composition: Not reported**
5. **Physical form/shape: Not reported**
6. **Purity: Not reported**
7. **Size distribution: Not reported**
8. **Solubility: Not reported**
9. **State of aggregation or agglomeration: Not reported**
10. **CAS number (if applicable): Not reported**

### Product description

Information about the nanomaterials used in the product is not available just as information about the location of the nanoelement in the product is also not available.

### Applications

## APPENDIX 1: NanoRiskCat

### Exposure potential for professional end-users

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for professional end-users is** •

### Consumer exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for consumer is** •

### Environmental exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Environmental exposure potential is** •
