

## 2.97 Ct Oval Green Simulated Emerald 925 Sterling Silver Earrings

### Nanomaterial description

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: Not reported
5. Physical form/shape: Not reported
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

### Product description

Information about the nanomaterials used in the product is not available just as information about the location of the nanoelement in the product is also not available.

### Applications

### **Exposure potential for professional end-users**

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for professional end-users is** •

### **Consumer exposure potential**

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for consumer is** •

### **Environmental exposure potential**

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Environmental exposure potential is** •
