

# Mac Pro<sup>®</sup> produced by APPLE

## Nanomaterial description

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: SiO<sub>2</sub>
5. Physical form/shape: Not reported
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

## Product description

Processors. The nanoelement is assumed to be in the form of structured film.

## Applications

## Exposure potential for professional end-users

Given the nature of the product and the location of the nanoelement, exposure for professional end-users to is not to be expected.

Hence we concluded that the overall Exposure potential for professional end-users is 

## APPENDIX 1: NanoRiskCat Template

### Consumer exposure potential

Given the nature of the product and the location of the nanoelement, consumer exposure is not to be expected.

Hence we concluded that the overall *Exposure potential for consumers is* ●

### Environmental exposure potential

Given the nature of the product and the location of the nanoelement, environmental exposure is not to be expected during use.

Hence we concluded that the overall *Environmental exposure potential is* ●
