

## Platform Straightener produced by FHI Heat

### Nanomaterial description

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: Not reported
5. Physical form/shape: Not reported
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

### Product description

Hair straightener. Location of the nanoelement is unclear.

### Applications

### Exposure potential for professional end-users

Given that the location of the nanoelement of the product is unknown, we concluded that the overall Exposure potential for professional end-users is ●

## APPENDIX 1: NanoRiskCat●●●|◆◆ Template

### Consumer exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall Exposure potential for consumer is ●

### Environmental exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall Environmental exposure potential is ●
