

BionTech BTM200N Water Ionizer produced by Biontech

Nanomaterial description

1. Material source or producer: Not reported
2. Manufacturing process: Not reported
3. Appearance: Not reported
4. Chemical composition: Ag
5. Physical form/shape: Not reported
6. Purity: Not reported
7. Size distribution: Not reported
8. Solubility: Not reported
9. State of aggregation or agglomeration: Not reported
10. CAS number (if applicable): Not reported

Product description

Water ionizer. The location of the nanoelement in the product is unclear.

Applications

Exposure potential for professional end-users

APPENDIX 1: NanoRiskCat●●●|◆◆ Template

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for professional end-users is** •

Consumer exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Exposure potential for consumer is** •

Environmental exposure potential

Given that the location of the nanoelement of the product is unknown, we concluded that the overall **Environmental exposure potential is** •
