

Nanotol the universal nano sealant by CeNano

Nanomaterial description

1. **Material source or producer: Not reported**
2. **Manufacturing process: Not reported**
3. **Appearance: Not reported**
4. **Chemical composition: Not reported**
5. **Physical form/shape: Not reported**
6. **Purity: Not reported**
7. **Size distribution: Not reported**
8. **Solubility: Not reported**
9. **State of aggregation or agglomeration: Not reported**
10. **CAS number (if applicable): Not reported**

Product description

Sealant. Nanoparticles are assumed to be suspended in liquid.

Applications

“Clean surfaces with the nanotol primer and dry them off with a microfiber cloth

Apply nanotol sealant with the sponge cloth and let the surface dry

Polish the surface with a second microfiber cloth FINISHED ”

APPENDIX 1: NanoRiskCat●●●|◆◆ Template

Exposure potential for professional end-users

Given the nature of the product, the location of the nanoelement as well as the described usage, exposure for professional end-users seems to be expected mainly as skin contact with the cloth soaked in the sealant cannot be ruled out.

Hence we concluded that the overall Exposure potential for professional end-users is ●

Consumer exposure potential

Given the nature of the product, the location of the nanoelement as well as the described usage, consumer exposure seems to be possible mainly as skin contact with the cloth soaked in the sealant cannot be ruled out.

Hence we concluded that the overall Consumer exposure potential is ●

Environmental exposure potential

Given the nature of the product, the location of the nanoelement as well as the described usage, environmental exposure seems to be expected. The main outlets to the environment are via spillage during use as well as general wear and tear of the created surface.

Hence we concluded that the overall Environmental exposure potential is ●
