X5 7024 Superlite Nano Ceramic Tourmaline Dual Voltage Travel Iron

Nanomaterial description

1. **Material source or producer: Not reported**
2. **Manufacturing process: Not reported**
3. **Appearance: Not reported**
4. **Chemical composition: Not reported**
5. **Physical form/shape: Not reported**
6. **Purity: Not reported**
7. **Size distribution: Not reported**
8. **Solubility: Not reported**
9. **State of aggregation or agglomeration: Not reported**
10. **CAS number (if applicable): Not reported**

Product description

Nanoparticles are assumed to be located on the surface of the product.

Applications

Exposure potential for professional end-users

Given the nature of the product and the location of the nanoelement, exposure for the professional end-users seems possible.

Hence we concluded that the overall ***Exposure potential for professional end-users is*** ●

APPENDIX 1: NanoRiskCat●●●|●● Template

Consumer exposure potential

Given the nature of the product and the location of the nanoelement, consumer exposure seems possible.

Hence we concluded that the overall ***Exposure potential for consumers is*** ●

Environmental exposure potential

Given the nature of the product and the location of the nanoelement, environmental exposure seems possible either directly via general usage or indirectly via cleaning of the product.

Hence we concluded that the overall ***Environmental exposure potential is*** ●
